Special regulations for authors – Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Submission of an article entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S.351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the U.S.A. – This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, U.S.A. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US $2.25, also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Although all advertising material is expected to conform to ethical standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

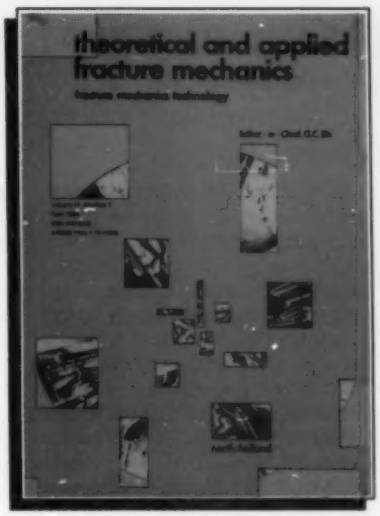
Theoretical and Applied Fracture Mechanics

An International Journal devoted to research in the Theoretical and Experimental Aspects of Material Damage



This journal comprises two communications: **Fracture Mechanics Technology** and **Mechanics and Physics of Fracture**

FRACTURE MECHANICS TECHNOLOGY
Fracture Mechanics Technology emphasizes material characterization techniques and translation of specimen data to design. Contributions cover the application of fracture mechanics to hydro and electric machinery, offshore oil exploration equipment, pipelines and pressure vessels, nuclear reactor components, air, land and sea vehicles, and many others.

MECHANICS AND PHYSICS OF FRACTURE
Mechanics and Physics of Fracture encourages publication of original research on material damage leading to crack growth or fracture in materials such as metal alloys, polymers, composites, rocks, ceramics, etc.

Abstracted/Indexed in:
Cambridge Scientific Abstracts, Current Contents, Engineering Index, Physics Abstracts.

Editor-in-Chief:
G.C. Sih, *Institute of Fracture and Solid Mechanics, Lehigh University, Bethlehem, PA, USA*

Subscription information:
1990: Vols. 13 & 14 (6 issues)
US$ 303.00 / Dfl. 606.00, including postage
ISSN: 0167-8442

The Dutch Guilder (Dfl.) price is definitive. US $ price is subject to exchange rate fluctuations.

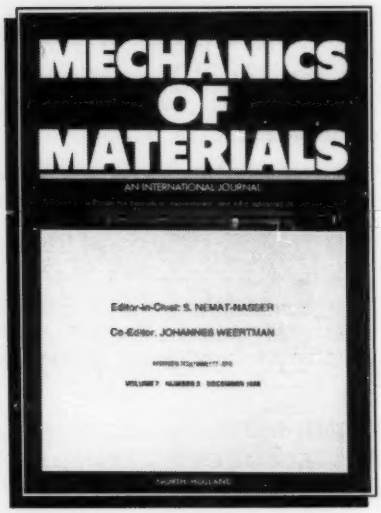
Mechanics of Materials

An International Journal



Mechanics of Materials provides a forum for original scientific research on the flow, fracture, and general constitutive behavior of advanced, technological and natural materials, with balanced coverage of theoretical, experimental, and field investigations. Of special concern are macroscopic predictions based on microscopic models, identification of microscopic structures from limited overall macroscopic data, experimental and field results that lead to fundamental understanding of the behavior of materials, and coordinated experimental and analytical investigations that culminate in theories with predictive quality.

Mechanics of Materials publishes original contributions on the thermomechanical behavior of advanced technological materials such as metals, polymers, ceramics, various advanced composites, wood, etc., geotechnical materials such as rock and soil, and on thermomechanical processes pertaining to solid earth geophysics.

Abstracted/Indexed in:
Applied Mechanics Reviews, Engineering Index, INSPEC Abstracts, ISMEC, Metals Abstracts, Solid State Abstracts Journal, World Aluminium Abstracts.

Editor-in-Chief:
S. Nemat-Nasser, *University of California, San Diego, CA, USA*

Subscription Information:
1990: Vols. 9 & 10 (6 issues)
US$ 263.00 / Dfl. 526.00,
including postage
ISSN: 0167-6636

The Dutch Guilder (Dfl.) price is definitive.

INFORMATION FOR CONTRIBUTORS

Manuscripts should be sent in triplicate to one of the Editors. All manuscripts will be refereed. Manuscripts should preferably be in English. They should be typewritten, double-spaced, first copies (or clear Xerox copies thereof) with a wide margin. Abstracts, footnotes and lists of references should also be double-spaced. All pages should be numbered (also those containing references, tables and figure captions). Upon acceptance of an article, author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Abstracts
The text of a paper should be preceded by a summary in English. This should be short, but should mention all essential points of the paper.

Figures and tables
The drawings for the figures must be submitted on separate sheets, drawn in black India ink in large size and carefully lettered (with the use of stencils). The lettering as well as the details should have proportionate dimensions, so as not to become illegible or unclear after the usual reduction by the printers; in general, the figures should be designed for a reduction factor of two or three. Mathematical symbols should be entered in italics, where appropriate. Each figure should have a number and a caption; the captions should be collected on a separate sheet. The appropriate place of a figure should be indicated in the margin. Tables should be typed on separate sheets. Each table should have a number and a title. The appropriate places for the insertion of tables should be indicated in the margin. In case the author wishes one or more figures to be printed in colour, extra costs will arise. These costs may, in consultation with one of the editors, partly be charged to the author.

Formulae
Displayed formulae should be numbered and typed or clearly written by hand. Symbols should be identified in the margin, where they occur for the first time.

References
In the text, reference to other parts of the paper should be made by section (or equation) number, but not by page number. References should be listed in a separate sheet in the order in which they appear in the text.

COMPLETE INSTRUCTIONS TO AUTHORS are published in every issue, and copies can also be obtained from the Editors and the Publisher, Elsevier Science Publishers B.V., P.O. Box 1991, 1000 BZ Amsterdam, The Netherlands.

INFORMATION FOR SUBSCRIBERS

COMPUTER METHODS IN APPLIED MECHANICS AND ENGINEERING (ISSN 0045-7825) is published in six volumes (18 issues) a year. The subscription price for 1990 (Volumes 78–83) is SFr. 1980.00 + SFr. 180.00 p.p.h. = SFrs. 2160.00 (approximately US$ 1293). Our p.p.h. (postage, packing and handling) charge includes surface delivery of all issues, except to subscribers in the following countries where air delivery (S.A.L. – Surface Air Lifted) is ensured: Argentina, Australia, Brazil, Canada, Hong Kong, India, Israel, Japan (+40% normal p.p.h.), Malaysia, Mexico, New Zealand, Pakistan, P.R. China, Singapore, South Africa, South Korea, Taiwan, Thailand, U.S.A. For the rest of the world airmail charges are available upon request. Claims for missing issues will be honoured free of charge within three months after the publication date of the issues. Mail orders and inquiries to: Elsevier Sequoia S.A., P.O. Box 851, CH-1001 Lausanne 1, Switzerland.

INFORMATION FOR ADVERTISERS

Advertising orders and inquiries can be sent to the Advertising Manager, Elsevier Science Publishers B.V., Journal Division, P.O. Box 211, 1000 AE Amsterdam, The Netherlands.

Special regulations for authors
Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.
Submission of an article entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S.351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the U.S.A.
This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, U.S.A. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US $2.25, also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.
